FACTORY

DoorArreda

An entirely Italian factory, that designs and produces interior doors.
Strictly Made in Italy.

A very wide range of technical solutions, which represents our starting point. Because there is much more. Our vocation and specialty in fact is made to exceed our standard. Custom made is our philosophy. In DoorArreda the client finds solutions to projects from the most classic to the most architecturally original. Artisan planning and productive capacity merge to give life to high quality products with actual costs and real times.

Our know How of manufacturing interior doors come from several decades ago. We belong to the great tradition of one of the industrial districts that has exported the artisan specialty in the world.

DoorArreda S.r.l Sale Conditions

Art. 1 General Conditions of Sale

The following general conditions are an integral part of every sales contract between DoorArreda S.r.l. and the buyer. This list cancels and replaces all previous ones.

Errors and/or printing errors do not constitute as grounds for dispute by anyone.

Art. 2 Contracts

The order proposals are not binding and only accepted after a written confirmation from the seller. The only valid order is the one signed by the buyer and in the seller's possession.

The contract is always completed at the headquarter of the seller, even in the case in which negotiations have been carried out from sales agents without same powers of representation.

Art. 3 Terms and conditions

The delivery terms are indicative and not mandatory and begin from the arrival date at the premises of the seller of the final date for order fulfillment.

In the event of delivery delays, the seller assumes no responsibility and will not be liable for damages that arise indirectly or directly to the buyer. Any delay or damages will not result in cancelation or termination of the contract or reduce the order, except in cases of willful misconduct or gross negligence.

Strikes or other business contingencies, seizures, suspension of electricity, fires, breakdowns, transport difficulties, floods, etc. constitute cases of a greater force which exempt the seller from liability.

At any time can be interrupted, suspended, or canceled deliveries from the seller, without obligation for compensation if the materials are not available on the market.

In the event in which the seller has motive to believe the buyer does not intend to or cannot pay of the merchandise within the allowed time, the same provision applies to the delivery of the merchandise until a prompt and adequate payment is guaranteed. In the case of a missed delivery of the merchandise for reasons not caused by the seller, storage costs will begin and the seller is not responsible for fire, flood, or other damages.

Art. 4 Shipping and handling

The goods travel at the risk of the buyer, unless it is agreed in writing otherwise. In every case, the risk is passed to the buyer at the latest when the delivery is sent to the first route, carrier, or shipper. Thus, in the case of late deliveries, lost or damaged goods during transportation, the claims must be addressed exclusively by the buyer to the carrier, also if instructed by the seller.

Regarding the packaging, the seller will perform the same as normal, and it will be performed in a suitable manner. Unless special arrangements have been made for special packaging, the seller will not accept returned packages.

Art. 5 Warranty

The warranty applies in all cases in which there are defects or manufacturing defects of the product, attributable to the seller which affect the proper use or make it unusable. This warranty consists only for the replacement of products recognized as defective by the seller in the shortest technical time as possible; furthermore, in any case no other rights or claims will be granted to the buyer.

In any case, the complaints must be in accordance with the provision of art. 6 of the present sales conditions.

They will not accept returns or replacement previously authorized in writing by the seller. Any credit or replacement will be valid only after the seller has received the returned defective merchandise.

The articles provided by the seller are guaranteed without fault by quantity and workmanship for 24 months from the invoice date. Any repair costs performed without specific authorization from the seller will not be recognized. Furthermore, the seller reserves the right to decide the manner and conditions for distribution of the replaced merchandise, including the possibility of not accepting the defected merchandise. These procedures will be declared separately. The warranty does not apply in the case of not following the instruction of: installation, storage, use, maintenance mentioned by the seller in the technical documents.

The warranty does not cover:

- 1) the installation, the commissioning works, the modification or mass production of the product;
- 2) lack of complete or partial respect for the conditions and instructions cited in the sales conditions from the salesperson;
- 3) in case of voluntary deterioration;
- 4) in case of major force caused by unforeseeable external events (earthquakes, floods, tornadoes, etc.);
- 5) when the product has been assembled and maintained with labor or parts not original from the vendor;
- 6) damage caused during transportation, loading and unloading merchandise;
- 7) in the case of absence in maintenance or improper use of the product; the warranty is considered null and void in the event the buyer fails to comply with the payment terms.
- 8) Any aesthetic variations of the products or components changes which at the discretion of the seller do not alter the correct functioning of the products and give greater reliability of service and continuity of production.

The installation of doors and accessories implies the acceptance for the entire product.

To use the warranty service the buyer must provide a copy of the invoice.

The warranty does not apply to technical accessories not manufactured by the vendor, the warranty of the mother company will be recognized.

Art. 6 Complaints

The material delivered to the buyer's deposit is considered accepted and liked in the same with a signature on the shipping documents with both reference to the quality and quantity of parts and accessories.

The seller does not assume any responsibility for dents or alterations of material after the delivery and the opening of material during loading, especially in the case in which they have done an examination upon receipt of goods.

Complaints relating to disparities in the invoice must be made by the final deadline of 8 days from the invoice, which will be issued within the terms of the law.

Claims for delivery errors/incomplete deliveries or damaged or defected or deformed goods must be made, are ineffective and not valid unless the form has been completed, mailed, and supplied by no later than one week of the received delivery.

Claims of any kind, will not entitle the buyer the ability to suspend payment within the agreed terms neither in the disputed merchandise or other furniture.

Art. 7 Payments

The payments are not valid unless they are made directly to the headquarter of the seller. Delayed payment (total or partial) from the buyer constitutes as grounds for terminating the contract in accordance with art. 1456 cc. In the case of delayed payment, full or partial, on behalf of the buyer, it will be the responsibility of the seller to suspend or modify the terms of the delivery in progress, even if referring to other furniture, and even despite the provisions of article 1460 c.c., with expressed waiver by the buyer to compensation in any resulting damage, except in cases in which depends on intent or gross negligence of the seller. The payments cannot ever be suspended or delayed for any reason, neither for partially and any other reason, and it is impossible for the buyer to lift any dispute before fulfillment. In the unsolved cases, the buyer is obligated to withdraw with immediate payment of prepared products after receiving notice of obligatory completion executed in the art. 1515 c.c. and compensation of damages.

The seller will be able to change or cancel the terms or conditions of payment if the buyer does not promise or guarantee, at the discretion of the seller, the commercial references, economic and financials of the buyer, also if it is before the start of the supplies, they do not offer appropriate guarantees for the successful completion.

The anticipated materials or delivery must be paid in every case and does not affect the continuation of the supply.

In any case of late payment the buyer will be required to pay to the seller the default interest referred to in D. Lgs. 231/2002, in addition to damages and expenses.

In the buyer becomes bankrupt or should reduce the guarantees given, or does not confirm the promised guarantee, the seller has the right to demand immediate payment, whether related to different orders or for partial deliveries, according to the law of the term benefit.

Art.8 Mutual exchange of information

Under the art. 13 of the D.lgs. June 30, 2003 n. 196, with reference to the personal information of the parties, acquired during the negotiation and conclusion of the contract and during the course of contractual relationship, the parties both guarantee that:

- 1) the personal data will be processed with the help of electronic and/or automated means for the execution of obligations under the contract, to perform market surveys of customer satisfaction or for the fulfillment of legal obligations and/or provisions of public authorities;
- 2) the confirmation of personal information is optional but a possible refusal to supply the information could lead to difficulties in the conclusion, management and execution of the contract;
- 3) the personal data will be exclusively communicated to party advisers or people appointed by the parties to process information, for the purposes set out in point 1 and will not be disclosed to third parties.

In relation to the processing of personal information the parties may exercise their rights under art. 7 of D.lgs. June 30, 2003, n. 196.

Art. 9 Jurisdiction

Any dispute relating to and/or connected to the sales contract will be brought before the Court of Pordenone (Italy), even if the payment is agreed to with a draft or promissory note established by the debtor. This competence cannot be derogated neither in guarantee calls and for communion reasons or connection.

Art. 10 General

Failure to exercise any of the preceding provisions shall not constitute a waiver of the same. The invalidity and/or nullity of any of the preceding provisions shall not result in invalidity and/or nullity of the other provisions of the sales conditions.

ESTIMATE:

Non-binding document to the purchase that allows the verification of the estimated price of the factory.

ORDER CONFIRMATION:

Document binding to the purchase that allows the buyer to verify the configuration of the selected products and thus proceed with the start of the production of the merchandise. The start of production is subject to sending us the document (order confirmation), sealed and signed for acceptance at our commercial offices.

PRONTA CONSEGNA (IN STOCK Products)

Term used in reference to the merchandise produced available, prepared within a period of 5 business days from the receipt of the confirmed order signed to DoorArreda. Attention: foreign countries that require special certifications, the times will also depend on said documentation.

DIMENSIOS:

All the measures or dimensions in the price list, unless otherwise specified, are expressed in millimeters (mm).

PRICES:

The prices in the price list are expressed in Euros (€) and are intended for products free of charge, excluding transport costs, packing costs, various accessories and statutory taxes.

SURCHARGES / UPGRADES:

Terminology indicating variants applicable to standard products. The prices in the surcharges items must be added to the price of the standard products.

ACCESSORIES:

Series of items/accessories sold separately from the product.

PACKAGING:

Term indicating the protection applied to products for the purpose of protection against movements.

LEGNI E TEXTURE:

Identify the aesthetics of the decorative coating of DoorArreda products. They are characterized by a high resistance to scratches and bumps. The laminates are composed of layers of different materials, impregnated with resins to protect a vegetable parchment support with remarkable flexibility characteristics, which varies according to the technical and thickness requirements, all kept amalgamated by means of die-casting processes. This coating guarantees durability over time by improving the intrinsic characteristics of the wood which forms the structure of the panels, case frames and casings (architraves) used in the products.

RESINE PAINT:

Decorative finishes with water base applied by hand. Pearlescent metallic effect obtained thanks to the presence of an aluminum pigment in the solution which allows to obtain fine aesthetic effects with glossy matt contrasts in relief. Product that can also be purchased loose to be able to create surfaces and walls combined with door products. The resins give the products considerable resistance to shocks and the aggressiveness of liquids in general and can be applied by brush, roller or spray according to the desired final effect.

SABLÉ LACQUERED

Term that identifies a specific DoorArreda lacquering, created through the use of a covering paint highly resistant to exposure to UV rays. The Sablè lacquer is characterized by a light embossed effect that is soft to the touch, which guarantees better uniformity of coverage of the surfaces compared to traditional lacquers. Thanks to the presence of metal microspheres in the composition of the paint, it guarantees high resistance to scratches.

BIANCO DA LACQUERED

It is a matt lacquered finish (not with a Sablè effect) resistant to UV rays capable of maintaining the shade over time. This finish has a shade similar to RAL9016. The lacquered panels in Bianco DA finish are accompanied as standard by jambs and architraves covered in smooth Bianco laminate in the same color tone.

GLASSES WITH SANDBLASTED DECORATIONS:

Made by engraving the glass surface with a sand blasted technique, the result obtained is a tone on tone, porous to the touch. The designs in the price list are proportioned for glass 550x1600mm dimension. The decor is adapted to the required door size (enlarged, reduced, modified). The decorations can be performed on transparent, satin, reflective glass, etc. The sandblasting effect is always whitish but always reflects the color of the support with a tone-on-tone effect. Sandblasting the two sides of the glass (example Mid 3D decoration) creates a pleasant three-dimensional effect. In addition to the decorations in the price list, it is possible to create personalized designs on request, subject to verification and confirmation by our offices.

GLASSES WITH NATURAL FABRIC (LINEN AND TAFFETA':

The fabric is stratified between two glasses, which in addition to the darkening effect gives the glass a elevated elegance while also offering ease of washing.

CLEANING AND MAINTENANCE:

Set of operations that must be carried out to always keep the products in due functional and aesthetic efficiency. The recommended processes are different based on the type of material and finish.

DASP:

Custom Design DoorArreda. It is processed following acceptance of the estimate and will refer to compositions, special products that are not included in the standard technical catalog of the company and in the proposal available in the general catalogue. In the case of a DASP order, it is recommended to consider an additional 7 working days following acceptance of the estimate, the period of time necessary for the company to develop the order confirmation accompanied by the specific technical drawing (DASP) to be verified and confirmed for the putting into production.

CLEANING AND MANTAINENCE**LEGNI E TEXTURE:**

It is recommended to use a soft cloth dampened with neutral detergents diluted in hot water.

SABLE' LACQUERED AND BIANCO DA LACQUERED:

We recommend wetting a soft lint-free cloth with warm water or using specific products for lacquered surfaces.

FLOAT/SATIN/REFLEX GLASSES:

For daily non-aggressive cleaning, just moisten a glass cloth (cotton or microfiber) with plain clean water, wiping and wiping with circular movements so as not to leave halos and not to press too hard on the pane. To remove grease stains (fingerprints), apply a normal glass cleaner to the glass and distribute the product very gently on the glass surface.

GLASSES WITH SANDBLASTED DECORATIONS:

Use a soft, non-abrasive cloth with water. Do not use detergents.

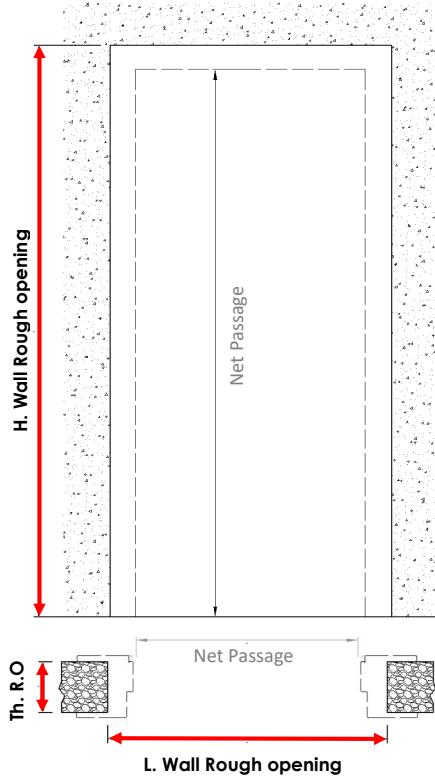

GLASSES WITH NATURAL FABRIC (LINEN AND TAFFETÁ):

See the Float/Satin/Reflex glass process.

The Price List is composed of a new highlighted and logical system for composing prices, the "A+ system" is composed of 4 sections to achieve pricing. The customer must always take as a reference a price "A" for the BASE, then add the increases or sur-charges "B" for the variations of the basic fittings (hardware), "C" for the variants of measures, "D" for the particular versions.

If necessary to configure other accessories sur-charges or upgrades see page:

139

A BASE Price In this chapter, the customer must take the Base Price referring to the FINISH combined with TOP, TREND, TREND-s, FLUSH frames (for sliding doors, start from the TOP price).

B HARDWARE Variation In this chapter the customer must take the surcharges for HINGES, LOCKS and HANDLES.

C NON-STANDARD Dimensions In this chapter the customer must take the surcharges for all the Variants referring to dimensions (HEIGHT, WIDTH and WALL THICKNESS), if the requested measure is standard it is not necessary to apply the increases in chapter "C"

D SPECIAL Variations In this chapter the customer must take the surcharges for the special variants, such as SOLID; FUTURA; PARTICULAR; BIDIRECTIONAL versions; FOLDABLE and SLIDING.

A BASE Price

In this chapter, the customer must take the Base Price referring to the FINISH of the glass and the measurements. Then add the finish of the door profile and the case frame according to the required configuration.

B HARDWARE Variation

In this chapter the customer must take the surcharges for: LOCKS and HANDLES.

C NON-STANDARD Dimensions

In this chapter the customer must take the surcharges for the Variants referring to the WALL THICKNESS measures, if the required dimension is standard it is not necessary to apply the upgrade in chapter "C"

D SPECIAL Variations

In this chapter the customer must take the surcharges for the special variants, PARTICULAR; BIDIRECTIONAL versions; SLIDING.

B**Additional HARDWARE****Hinges**

- Each collection, and each frame has its own standard hinges depending on the technical differences, therefore it please check the expected availability of each frame at the beginning of each collection.

	Pivot: Standard with the TOP frame on the TINEO collection for doors with panel height up to H.2100mm. It can be requested with price reduction on the other collections that can be requested with the TOP frame. Finishes: Satin Chrome, Matt Black and Polished Brass.	
	A Invisible Pivot for honeycomb core doors: Standard with TREND and TREND-S frame on TINEO collection for doors with panel height up to H.2100mm, can be requested with a price reduction on the other matching collections.	
	A Invisible Pivot for doors from the SEVEN collection: Standard with the SEVEN collection. Chrome finish.	
	Concealed: Standard on the Filoparete version of the honeycomb doors, in chrome finish. 3 pieces are used for doors with a height lower than passage H. 2400mm, 4 pieces for doors with a height greater than passage H. 2400mm.	

Locks**For swing doors**

- The standard lock included on the tamburated door is the magnetic UE key (chiave) lock in satin chrome finish.
- For the doors of the SEVEN Collection, the FUTURA closing system is included (described on the following page). To combine other types of lock, check the surcharges of the collection here mentioned.
- The types of locks? the QUADRO locks for locking with WC pawl (nozzle "knob" not included), and the YALE lock for locking with cylinder (cylinder not included) are available with a surcharge price.

**For Sliding or Seven Collection with mechanical hook lock**

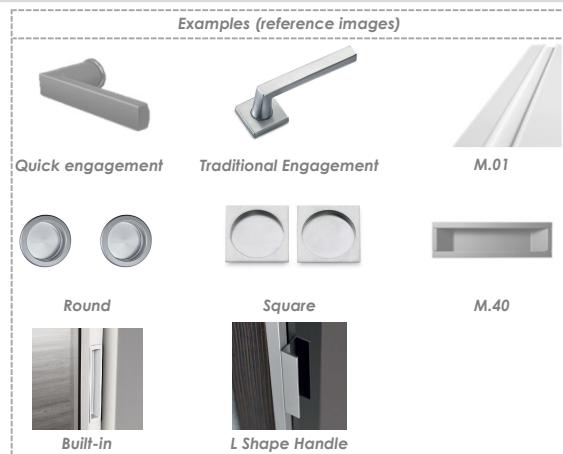

- Standard sliding doors do not include locks.
- The standard lock included on the tamburated doors is the mechanical hook lock in satin chrome finish.
- Sliding door locks are available privacy knob or Yale lock with his own cylinder.

Finishes

- The standard locks included are in a Satin chrome finish
- The locks available Finishes with surcharges price are the following: Matt White, Matt Black and Polished Brass.

Handles

- The handles on the tamburated doors are not included. Prices and finishes are available on page 145
- The models are distinguished between handles with a quick coupling system (they do not require the use of fixing screws), and handles with a traditional rosette that needs fixing screws. Both cases exists round or square roses.
- The built-in handles on the tamburated doors are M.01, M.40, Round and Square handles are also available for sliding and folding doors.
- The standard handle of the Seven collection is the built-in handle in the profile, the Angular handle is also available in certain cases and in the case of swing doors with magnetic lock the DALLAS handle is available.

C**NON STANDARD Dimensions**

- The standard sizes are: **passage height 2100mm and passage widths 600, 650, 700, 750, 800mm.**
- There are non-standard dimensions with their surcharge price.
- Each collection and each finish has non-standard measurements depending on the technical differences, therefore it is requested to check the expected availability of each collection at the beginning of each one.

Height

- The height taller than H.2100 mm is achieved using H.2400mm panels. This supplement includes 3 concealed hinges. If the measurement is intermediate, it is necessary to add the reduction in height.

For heights greater than H. 2100mm check the availability of the finishes.

- The height taller than H.2400 mm is achieved using H.2690mm panels. This supplement includes 4 concealed hinges.

If the measure is intermediate, it is necessary to add the surcharge reduction in height.

Panels higher than H.2400mm are only available in finish: White Laminate, Primed or Lacquered.

- The height taller than H.2690 mm is achieved using H.2910mm panels. This upgrade provides 4 concealed hinges. If the measurement is intermediate, it is necessary to add the sur charge reduction in height.

The height taller than 2690mm is only available in Primed or Lacquered finish.

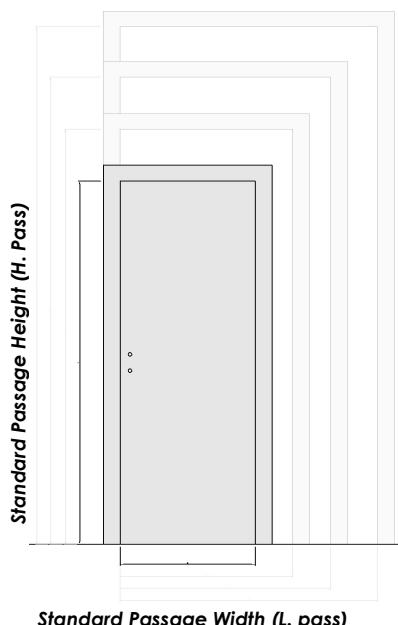

Length

- The widths 850, 900 and 1000mm are available by applying a surcharge.
- The maximum width that can be reached with the panels on swing doors is a L. passage of 1000mm.
- The maximum size that can be reached on sliding doors with honeycomb panels is 1170mm. (finished panel size). (Not all finishes apply)
- If the dimension is intermediate, it is necessary to add the surcharge of the length.

Wall thickness

- The standard wall thickness are:
 - **TOP:** With frame from: 65mm - 90mm - 107mm - 117mm cover walls of: 55-119mm
 - **TREND:** With frame of: 80mm - 93mm - 113mm cover walls of: 62-120mm
 - **TREND-s:** With frame of: 105mm cover walls of: 104-119mm
- It is possible to cover wider wall thicknesses with two distinct solutions:
 - **Joined frames:** Custom made product up to more than 500mm, by applying the surcharge in the table on page 140
 - **Enlargement Kit (ext):** With 3 types of enlargements, 16mm 60mm 220mm in the accessories chapter on page 143

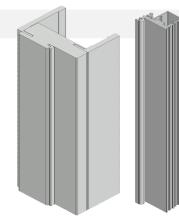

In this case the enlargement kits are supplied separately and can also be purchased separately from the door.

D**SOLID****Body Frame (Jamb):**

GLASSES Selection

NOTES:

- Decorations are proportioned on glass measuring 600mmx1700mm.
- Glass sizes variations may involve changes to the decorations at the discretion of DoorArreda, in this case each Glass becomes a unique piece.
- **In sandblasted decorations, white corresponds to sandblasting and gray corresponds to transparency.**
- The decoration makes the glass not reversible, always indicate the direction of application of the decoration by referring to the opening verses.
- The sandblasted decoration is particularly sensitive to the aggression of dirt, contact with highly staining substances is strongly discouraged.
- For cleaning only use a soft cloth and water.

LEGEND:

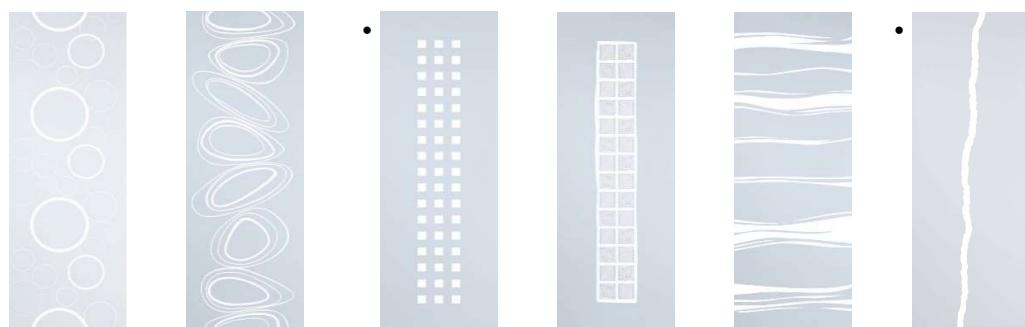

- This symbol communicates that the decoration can be requested inverted (apply a surcharge).
- This symbol communicates the side of the handle, not the height.
- RH** This symbol communicates that the drawing is right, the left would be the opposite.
